Itaque earum rerum hic tenetur a sapiente delectus, ut aut reiciendis voluptatibus maiores alias consequatur aut perferendis doloribus asperiores repellat.

A list

Here is an example of a list.

- a. first
- b. second
- c. third

Math

An equation can be typeset inline like $e^{\pi i} + 1 = 0$, or as a displayed formula:

$$\int_0^{\infty} t^4 e^{-t} dt = 24.$$

You can also have numbered equations:

$$\int_0^{\infty} t^5 e^{-t} dt = 120. \tag{1}$$

And you can refer to them by name. I called the previous equation `factorial-example`, and it is equation **1**. ConTeXt figures out the number for you. And with interaction turned on, you can click on the equation number to get to the equation.

This document is in the public domain, so that you can improve it, share it, and otherwise do what you want with it. Suggestions are welcome. You can send them to me at jc@kodfor.com (Jean-Claude Colette).
